## Workshops, Seminars, and Conferences on Research Methodology, Intellectual Property Rights (IPR), and Entrepreneurship for AY 2022-23 Reports and Circulars

### 1. Fundamentals and Advancements in Research Methodology (RM)

#### REPORT

**Title:** Fundamentals and Advancements in Research Methodology (RM)

**Date:** 20-04-2023

**Number of Participants:** 60

**Introduction:** The workshop on Fundamentals and Advancements in Research Methodology (RM) was conducted to equip participants with comprehensive knowledge and skills in research methodology. It aimed to enhance their research capabilities and promote a systematic approach to conducting research.

**Details of the Workshop:** The workshop covered various aspects of research methodology, including the formulation of research questions, literature review, data collection methods, and data analysis techniques. Participants were engaged through interactive sessions, group discussions, and practical exercises.

#### **Outcomes and Impact:**

- Enhanced understanding of research methodology.
- Improved skills in designing and conducting research projects.
- Increased awareness of ethical considerations in research.

**Feedback:** Participants appreciated the depth of knowledge shared and the interactive nature of the sessions. Suggestions were made for more advanced workshops on specific research techniques.

## 2. Training on Writing Research Project

### REPORT

**Title:** Training on Writing Research Project

**Date:** 20-08-2022

**Number of Participants:** 30

**Introduction:** The training session on writing research projects aimed to provide participants with essential skills and techniques for developing effective research proposals and projects.

**Details of the Training:** The session covered topics such as selecting research topics, structuring research proposals, writing literature reviews, and developing research objectives. Participants engaged in practical exercises to apply the concepts learned.

**Outcomes and Impact:**

- Improved ability to write and structure research projects.
- Enhanced skills in literature review and proposal writing.
- Increased confidence in developing research projects.

**Feedback:** Participants found the training highly beneficial and requested follow-up sessions on advanced topics in research writing.

## 3. Guest Lecture on IPR and Procedure for Filing Patents

### REPORT

**Title:** Guest Lecture on IPR and Procedure for Filing Patents

**Date:** 15-09-2022

**Number of Participants:** 60

**Introduction:** The guest lecture on Intellectual Property Rights (IPR) and the procedure for filing patents aimed to educate participants on the importance of IPR and the steps involved in protecting intellectual property through patents.

**Details of the Lecture:** The lecture covered the basics of IPR, the importance of protecting intellectual property, and the detailed procedure for filing patents. Real-life examples and case studies were discussed to provide practical insights.

**Outcomes and Impact:**

- Increased awareness of IPR and its importance.
- Improved understanding of the patent filing process.
- Encouraged participants to consider patenting their innovations.

**Feedback:** Participants appreciated the practical insights and real-life examples shared during the lecture. Suggestions were made for more detailed sessions on specific types of IPR.

## 4. Seminar on Role of Data Science in Research Methodology

### REPORT

**Title:** Seminar on Role of Data Science in Research Methodology

**Date:** 11-11-2022

**Number of Participants:** 60

**Introduction:** The seminar on the role of data science in research methodology aimed to highlight the importance of data science techniques in conducting research and analysing data.

**Details of the Seminar:** The seminar covered topics such as data collection methods, data analysis techniques, and the application of data science tools in research. Interactive sessions and practical examples were used to illustrate the concepts.

**Outcomes and Impact:**

- Enhanced understanding of data science and its applications in research.
- Improved skills in data collection and analysis.
- Increased awareness of data science tools and techniques.

**Feedback:** Participants found the seminar informative and beneficial, with suggestions for more hands-on sessions on data science tools.

## 6. Seminar on Patent Publishing & Raising Funds

### REPORT

**Title:** Seminar on Patent Publishing & Raising Funds

**Date:** 06-01-2023

**Number of Participants:** 30

**Introduction:** The seminar on patent publishing and raising funds aimed to educate participants on the importance of publishing patents and the strategies for securing funding for research and development projects.

**Details of the Seminar:** The seminar covered the process of publishing patents, the benefits of patent publishing, and various methods of raising funds for research projects. Practical examples and case studies were discussed.

**Outcomes and Impact:**

- Increased awareness of the benefits of patent publishing.
- Improved understanding of funding strategies for research projects.
- Encouraged participants to pursue patent publishing and seek funding opportunities.

**Feedback:** Participants found the seminar informative and requested more sessions on advanced topics in patent publishing and fundraising.

## 7. Guest Lecture on Research & Creation of Research Ecosystem

### REPORT

**Title:** Guest Lecture on Research & Creation of Research Ecosystem

**Date:** 02-02-2023

**Number of Participants:** 30

**Introduction:** The guest lecture on research and the creation of a research ecosystem aimed to provide participants with insights into developing a robust research environment and fostering a culture of research and innovation.

**Details of the Lecture:** The lecture covered the essentials of creating a research ecosystem, the role of collaboration, and the importance of a supportive environment for research activities. Practical examples from successful research ecosystems were discussed.

**Outcomes and Impact:**

- Enhanced understanding of the components of a research ecosystem.
- Improved knowledge of strategies for fostering research and innovation.
- Encouraged participants to contribute to building a supportive research environment.

**Feedback:** Participants appreciated the detailed insights and real-life examples shared during the lecture. Suggestions were made for follow-up sessions focusing on specific aspects of research ecosystems.

## 8. Seminar on Trends in Technology and Application Towards Research Projects

### REPORT

**Title:** Seminar on Trends in Technology and Application Towards Research Projects

**Date:** 10-03-2023

**Number of Participants:** 60

**Introduction:** The seminar on trends in technology and application towards research projects aimed to highlight the latest technological advancements and their applications in research. It focused on bridging the gap between technology and research.

**Details of the Seminar:** The seminar covered recent technological trends, their potential applications in various research fields, and practical strategies for integrating technology into research projects. Interactive sessions and case studies were included to provide practical insights.

**Outcomes and Impact:**

- Increased awareness of the latest technological trends.
- Improved knowledge of integrating technology into research projects.
- Encouraged participants to leverage technology for innovative research.

**Feedback:** Participants found the seminar highly informative and beneficial. They suggested more in-depth sessions on specific technologies and their research applications.

## “ANDROID APP DEVELOPMENT USING FLUTTER”

Date: 18.04.2023

### REPORT OF THE EVENT

The Department of Computer Science, Engineering, and Information Technology organized the “Android App Development using Flutter” Seminar in our CCET Campus on 18th April 2023. And the Seminar was coordinated by Mr.S.Joseph AP/ECE and Mrs.P.RoySudhaReetha AP/CSE of CCET. Students and staffs of CCET found the Seminar informative and worthwhile. Our primary goal was to increase their understanding and knowledge in working with Flutter tool. There were many topics covered during the Seminar presented by the Speaker Mr.M.BalaMurugan, CEO, Yosanaiangati AI Pvt.Limited. The major components of discussed in Flutter includes:

- Dart platform
- Flutter engine
- Foundation library
- Design-specific widgets
- Flutter Development Tools (DevTools)

It provides simplicity in the development process, high performance in the resulting mobile application, rich and relevant user interface for both Android and iOS platform, Flutter framework will surely enable a lot of new developers to develop high performance and feature-full mobile application in the near future.

A total 90 students got benefited through this Seminar.

## “Conditions of copyrights protection”

Date: 17.04.2021

### REPORT OF THE EVENT

One-day webinar was conducted by Department of Electronics and Communication Engineer of CCET on “**Conditions of copyrights protection**” on 17<sup>th</sup> April 2021

The presentation of the work must be descriptive and physical and must be capable of being recognized in a fixed form/recognized in its nature.

In order for a work of authorship to meet the requirements for copyright protection, the work must satisfy two basic criteria: originality, and fixation. The requirements for material to be copyright

For copyright to subsist:

1. There must be an expression of ideas in a literary, dramatic, musical or artistic work, or in subject matter other than works, such as in an audio-visual performance
2. The work must be original
3. The work must be recorded in a 'material form', for example
  - a. written down on paper or something else
  - b. recorded by keystrokes saved on a computer
  - c. recorded on film
  - d. recorded on tape
  - e. recorded as software code saved on a computer
  - f. recorded digitally onto a device
4. There must be an author or artist.

A total 100 students got benefited through this webinar. At the end of this course students learned on several conditions of copyrights protection such as basic criteria, requirements and principles.

## Art of Journal Writing in Research”

Date: 17.03.2021

### REPORT OF THE EVENT

One day webinar was conducted by Department of Mechanical Engineering of CCET on “Art of Journal Writing in Research” on 17<sup>th</sup> September 2021.

The guest speaker describes the history of journal writing within the context of the arts and humanities to illuminate our understanding of the tradition of this type of writing. For qualitative researchers, the act of journal writing may be incorporated into the research process to provide a data set of the researcher’s reflections on the research act. Participants in qualitative studies may also use journals to refine ideas, beliefs, and their own responses to the research in progress. Finally, journal writing between participants and researcher may offer the qualitative researcher yet another opportunity for triangulation of data sets at multiple levels: first, the interdisciplinary triangulation of journal writing as a trope of literature, and second, data triangulation in terms of journal writing of the researcher, participants, and interaction between both. The students were made aware of the rewards provided by the patent system, researchers and inventors would have better incentive to continue producing better and more efficient products for consumers. A total 360 students got benefited through this workshop.

A resource person Dr.M.Kanthababu explained about property rights on workshop on Intellectual Property Rights and Innovations at CCET seminar hall, administration block.

## Seminar on Emerging Research in Artificial Intelligence REPORT

The Department of Information Technology, Christian College of Engineering and Technology has organized a seminar titled “Emerging Research in Artificial Intelligence” on 15.03.2021, Mrs. P.Ranjana, Cathrine Info Tech, Madurai, had handled the session.

Artificial Intelligence (A.I.) is a multidisciplinary field whose goal is to automate activities that presently require human intelligence. Recent successes in A.I. include computerized medical diagnosticians and systems that automatically customize hardware to particular user requirements. The resource person has discussed the Artificial intelligence and about the domains where AI based technological devices being used. Her discussions were involved towards the use of Artificial intelligence and Machine Learning on social platforms and discussed algorithms which can be used to make graphs for analysis of data collected from these social platforms. Her speech was focused on developing intelligent algorithms for solving real time problems using Artificial intelligence techniques. This programme has been conducted with 20 students and it was an eye opener for the students to start their career towards AI.

## “Consideration on Selecting a Research Problem”

Date: 24.09.2020

### REPORT OF THE EVENT

One-day webinar was conducted by Department of Electronics and Communication Engineering of CCET on “**Consideration on Selecting a Research Problem**” through Google meet on 24<sup>th</sup> September 2020.

It must be narrow and focused enough to be interesting, yet broad enough to find adequate information. Before selecting your topic, make sure you know what your final project should look like Your skills, background knowledge versus your interest and societal need.

Selection of research problem depends on several factors such as researcher's knowledge, skills, interest, expertise, motivation & creativity with respect to the subject of inquiry. It is believed that most of the good research studies need lots of time for selection of a research problem.

A total 100 students got benefited through this webinar. At the end of this course students learned knowledge, skills, interest, expertise, motivation & creativity of a research problem.

## Workshop on “Element of Patentability”

Date: 17.09.2020

### REPORT OF THE EVENT

One day webinar was conducted by Department of Electrical and Electronics Engineering of CCET on “**Element of Patentability**” on 17<sup>th</sup> September 2020.

The core objective of the patent law is to promote the progress of Science and useful arts. It can be listed as: To encourage inventor: If a person puts efforts and resources in invention something that can be patented, he should have a provision that stops others from copying his work without his permission.

The purpose of a United States Patent is to provide the necessary teachings to the public about the invention such that a person who has training in the scientific field correlating to that invention could practice the invention based on those teachings. The students were made aware of the rewards provided by the patent system, researchers and inventors would have better incentive to continue producing better and more efficient products for consumers. A total 158 students got benefited through this workshop.

## Seminar on Strategies for Effective IPR Management

### REPORT

The Department of Information Technology, Christian College of Engineering and Technology has organized a seminar titled **Strategies for Effective IPR Management** on 24.07.2020, Mr. Bernard, NIIT, Dindigul had handled the session.

An IP strategy helps entities manage their intangible assets—including patents, trade secrets, trademarks, and copyrights—in a way that aligns with their overall business strategy and goals. Developing the right intellectual property strategy depends on an organization's industry and maturity. Regardless of these defining factors, a strategic plan should also be flexible. The resource person has begun the presentation with specifying the three critical elements namely protection, optimization, and monetization for Effective and strategic management of intellectual property. He has pointed out that an intellectual property rights strategy helps the entrepreneur to manage the intangible assets in a professional manner, in order to maximize the commercial benefits. At the end, he has concluded the session by discussing the Importance of IPR, job opportunities of IPR and motivated the students to do the certification course on IPR. This programme has been conducted with 20 students and made them to understand the concepts and strategies for managing the IPR effectively.

## “Government Policy for Small Scale Industry”

Date: 27.03.2020

### REPORT OF THE EVENT

One day workshop was conducted by Department of Electrical and Electronics Engineering at CCET on “Government Policy for Small Scale Industry” on 27<sup>th</sup> March 2020

The Small Scale Industrial Sector has emerged as a dynamic and vibrant sector of the economy during the eighties. At the end of the Seventh Plan period, it accounted for nearly 35 percent of the gross value of output in the manufacturing sector and over 40 percent of the total exports from the country. It also provided employment opportunities to around 12 million people. The primary objective of the Small Scale Industrial Policy during the nineties would be to impart more vitality and growth-impetus to the sector to enable it to contribute its mite fully to the economy, particularly in terms of growth of output, employment and exports. The sector has been substantially delicensed. Further efforts would be made to deregulate and de bureaucratize the sector with a view to remove all fetters on its growth potential, reposing greater faith in small and young entrepreneurs. All statutes, regulations and procedures would be reviewed and modified, wherever necessary, to ensure that their operations do not militate against the interests of the small and village enterprises. The students were made aware of the rewards provided by the patent system, researchers and inventors would have better incentive to continue producing better and more efficient products for consumers. A total 73 students got benefited through this workshop.

## Entrepreneurial Motivation

### REPORT

A One day seminar on **Entrepreneurial Motivation** was conducted by Department of Mechanical Engineering on **21<sup>st</sup>February 2020**. The resource person was Dr.S.Rajkumar Professor, RVS school of technology, Dindigul. Seminar started with the basic definition of Entrepreneur and the success stories of Entrepreneurs like Dhirubhai Ambani, JRD TATA, Shiv Nadar etc. And highlighted points from the seminar are the dynamic nature of today's business environment has led to an increase in the risk and uncertainties that are faced by organization. The growth in the degree of awareness of the customer has led to dramatic increase in competition as more and more companies are now trying to cater to the needs of these customers. It has become crucial for business to outshine competition in terms of provision of value of clients. An absence of proper planning and forethoughts leads to failure of entrants. The resource person enlightens the students with various feasibility study tool like Financial, Economical and Technical feasibility. The students were interacted with resource person then they cleared their queries with resource person. This seminar was very informative. A total 210 students participated and gained knowledge.

## **DEPARTMENT OF CIVIL ENGINEERING**

### **CIRCULAR**

The Department of Civil Engineering has planned to organize Two days Workshop on “**Basics on Analysis of Civil Structures by E-TABS**” on 06-02-2020 & 07-02-2020, by **Er. C. Karunai Selvan, CM Constructions, Dindigul**. All Civil Engineering students are instructed to make use of it without fail. This workshop will enable you all the things required for the structural analysis and design of a residential building, with all the aspects of the software from basic to the higher levels of the software as the course progresses.

Time: 9.30 a.m. to 4.30 p.m.

Venue: Cadd lab @ Dr. Jacob Cherian Block

**PRINCIPAL**

To be read in all classes

HOD: ECE / EEE / CSE / IT / CIVIL / MECH / S&H to be circulated among the staff members.

**DEPARTMENT OF CIVIL ENGINEERING**

**WORKSHOP ON BASICS ON ANALYSIS OF CIVIL STRUCTURES BY E-TABS**

**DATE:09.02.2020**

**SUMMARY**

The department of Civil Engineering has organized a two days workshop on Basics on Analysis of Civil Structures by E-TABS, for all the Civil Engineering students from 06.02.2020 to 07.02.2020. The objective of E-Tab analysis is to offer comprehensive knowledge in handling the largest and most complex building models and configurations. After the completion of this course, the students can acquire in-depth details about the different procedures and simplified analysis aspects of the design models.

### **REPORT**

The Department of Information Technology, Christian College of Engineering and Technology has organized a seminar titled “**Managing Enterprise and Identifications Risk Management**” on 10.01.2020 and Ms. S. Ishwarya, MAX Solutions, Coimbatore, has handled the session.

Leaders of organizations must manage risks in order for the entity to stay in business. Traditionally, organizations manage risks by placing responsibilities on business unit leaders to manage risks within their areas of responsibility. In this event, resource person has discussed the traditional approaches of risk management and their limitations. And also explained the essential elements of Risk Management process. Through this programme, students have learnt about how to identify the risks and learnt about key risk indicators to evaluate the severity of risk. 30 numbers of students from IT department were benefitted by this program.

## “Entrepreneurship: scope in local and global market”

Date: 20.12.2019

### REPORT OF THE EVENT

One day seminar on “**Entrepreneurship :scope in local and global market**” was conducted on 20<sup>th</sup> December 2019 by Department of Electronics and Communication Engineering, CCET. The seminar started with the Inaugural programme on 20<sup>th</sup> December 2019 at 10:00 AM. It was inaugurated by Mrs.T.Yasodha, Associate Professor and Head of ECE department, CCET and elaborated the aims and objectives of the Seminar. Mr.D.Kesavan, Assistant Professor of ECE department in his welcome address explained about the importance of Entrepreneurship skills.

A resource person Mr.P.Selva Ganesh, Digital Marketing Specialist, i-Noble solutions handled the seminar at CCET seminar hall. In his introductory speech he stressed the importance of team Efforts to succeed with perfection and explained the importance of Entrepreneurship skills and how to be a successful entrepreneur. He also gave guidelines about latest business scopes in local and global market. He also stressed the students to gather business ideas with updating the knowledge by reading and watching everyday news globally. Apart from the technology he explained the basic skills that every individual student should possess. He also explained entrepreneurship is important, as it has the ability to improve standards of living and create wealth, not only for the entrepreneurs but also for related businesses. Finally he concluded that the entrepreneurs also help drive change with innovation, where new and improved products enable new markets to be developed and beyond fulfilling a need and generating revenue for the entrepreneur, entrepreneurship provides jobs for society and develops communities.

All the II, III, IV years UG and PG students attended the programme and 102 students got benefitted.

## Seminar on How to Organize a Research Article REPORT

The Department of Information Technology, Christian College of Engineering and Technology has organized a seminar titled “**How to Organize a Research Article**” on 18.12.2019 and Mr. Ganesh Nag, Brainovision, Hyderabad, has handled the session.

The main purpose of this seminar was to create the skills of thesis and research paper writing for engineering students. The resource person has discussed the structure of research article, and described the ways to find a good topic for research and search databases for conducting comprehensive literature search. And he mentioned some of the key points like Research articles should include a methods section, a description of the subjects, procedures and tools used; should include findings, an explanation of conclusions; should include suggested further research; and should be peer-reviewed. This seminar has around 20 participants who have learnt to write the articles by themselves in a professional manner.

## “Research Perspective in Image Processing”

Date: 24.09.2019

### REPORT OF THE EVENT

One-day Seminar was conducted by Department of Electronics and Communication Engineering of CCET on “**Seminar on Research Perspective in Wireless communication**” on **24<sup>th</sup> September 2019**. In this seminar, we presented an introductory course design for fresh research-based graduate students in wireless communications, which is planned to be delivered immediately after enrollment. The seminar aimed at covering necessary research methodologies and the rudiments of wireless communications. Different from most graduate study curricula based on experiments, we design the course structure in an introductory manner by tailoring the course contents to a simplistic form and involving only simulations. We started by introducing the pedagogical background and our motivations for designing this course. Then, we presented the fundamentals and the technological contents, followed by detailing the basic research methodology, strategies, and skills for deriving insightful analytical expressions and carrying out numerical simulations.

We also verified the effectiveness of the course structure design by carrying out a teaching experiment and analyzing objective and subjective data collected from the experiment. By participating in this course, research-based graduate students gained preliminary knowledge of the research methodology and strategies in the field of wireless communications as well as a research roadmap.

The many academic areas covered in this seminar include, but are not limited to:

- Types of Wireless Communication.
- Satellite Communication.
- Infrared Communication.
- Broadcast Radio.
- Radio Communication.
- Microwave Communication.
- Wi-Fi Communication.
- Mobile Communication Systems.

A total 113 students got benefited through this Seminar.

## “Research Perspectives in Smart Grid”

Date: 18.09.2019

### REPORT OF THE EVENT

One day workshop was conducted by Department of Mechanical Engineering of CCET on “**Research Perspectives in Smart Grid**” on 18<sup>th</sup> September 2019 “Smart grid” generally refers to a class of technology used to bring utility electricity delivery systems into the 21st century, using computer-based remote control and automation.

These systems are made possible by two-way communication technology and computer processing that has been used for decades in other industries. The rise of smart grid is a boon not only to society as a whole but to all who are involved in the electric power industry, its customers, and its many stakeholders. The STC is intended to educate the participants about the concept of Smart Grid, the rationale for smart grid technology and its characteristics.

The concept of smart grid is to add monitoring, analysis, control and communication capabilities to the national electrical delivery system to maximize the throughput of the system while reducing the energy consumption. The STC will enhance the knowledge of the participants as to how the smart grids builds on many technologies already used by electric utilities but adds communication and control capabilities that will optimize the operation of the entire electrical grid. Smart grid is also positioned to take advantage of new technologies, such as plug in hybrid electric vehicles, various forms of distributed generation, solar energy, smart metering, lighting management systems, distribution automation and many more.

The objective of the short term training program on smart grid technologies is to integrate and optimize distributed energy resources to achieve a more efficient and reliable grid, enable active participation of consumers with more environmental constraints. Integration of distributed energy resources and storage devices particularly Plug-in-hybrid electric vehicles with the utility grid poses significant challenges. Smart grid technologies provide the basis for standards development that will facilitate widespread deployment and integration of distributed energy resources.

The aim of organizers is to bring up professional discussions on smart grid technologies and trends of power system operation and control to provide the educational platform and to assure dissemination of the knowledge to the participants. The students were made aware of the rewards provided by the patent system, researchers and inventors would have better incentive to continue producing better and more efficient products for consumers. A total 73 students got benefited through this workshop.

## SEMINAR ON FUNDAMENTALS IN ANALYSIS OF RCC AND STEEL STRUCTURES

BY STAAD PRO

DATE:24.08.2019

### SUMMARY

The department of Civil Engineering has organized a two days seminar on Fundamentals in Analysis of RCC and Steel structures by STAAD Pro, for all the Civil Engineering students from 21.08.2019 to 22.08.2019. The objective of STAAD Pro is to create a structural modelling, designing and analysis of Reinforced Cement Concrete and steel structures containing multi-storeys for different types of building based on its supporting and loading conditions. At the end of this course the students can work out geometry specifications, property details, support and loading particulars, analysis, post processing of concrete and steel designs.

## Optimization techniques in research

### REPORT

An One day workshop on **Optimization techniques in research** was conducted by Department of Mechanical Engineering on 31<sup>st</sup> July 2019. The resource person was Dr.K.Lingadurai, Professor, University college of Engineering, Dindigul. The seminar started with the introduction to basic numerical methods. He explained different optimization techniques such as ANOVA, TOPSIS, MAT lab etc. he highlighted like how original working parameters were correlated with optimization parameters. Students understood optimization techniques and its importance for research work. He compared with original parameters with numerical from different research work. This session was very interactive. The resource was answered more number queries from students. A total of 210 students participated and gained knowledge.

Workshop on “Methods of Data collection in Research”

Date: 06.03.2019

## REPORT OF THE EVENT

One day workshop was conducted by Department of Electrical and Electronics Engineering of CCET on “**Methods of Data collection in Research**” on 06<sup>th</sup> March 2019

Intellectual property rights like any other property right, they allow creators, or owners, of patents, trademarks or copyrighted works to benefit from their own work or investment in a creation. These rights are outlined in Article 27 of the Universal Declaration of Human Rights, which provides for the right to benefit from the protection of moral and material interests resulting from authorship of scientific, literary or artistic productions. Students learn intellectual property rights and how to obtain the copyright for their inventions.

The multibillion dollar film, recording, publishing and software industries would not exist without copyright protection. The students were made aware of the rewards provided by the patent system, researchers and inventors would have better incentive to continue producing better and more efficient products for consumers. A total 94 students got benefited through this workshop.

## Market survey and research

### REPORT

A One day seminar on **Market survey and research** was conducted by Department of Mechanical Engineering on **15<sup>th</sup> February 2019**. The resource person was Dr. M. Nagaraj Ganesh, Professor, Sethu Institute of Technology, Madurai. The seminar program started with inauguration by 2.30 pm. The resource person handled the session after inaugural. He presented about how to do research in field of Mechanical Engineering such as Welding technology, composite materials, Robotics, Nano coating technology etc. students got knowledge about how to find research gap, novelty from different discipline. This session was very useful. In interactive session students were asked questions and the resource answered all questions very clearly. A total of 300 students participated and gained knowledge.

**Date: 08.02.2019**

## REPORT OF THE EVENT

One-day Seminar was conducted by Department of Electronics and Communication Engineer of CCET on “**Seminar on Research Perspective in Image Processing**” on **8<sup>th</sup> February 2019**.

In this seminar on Research Perspectives in Image Processing, the advances of image processing and pattern analysis was discussed and how new innovations will cater to the demands of daily life are addressed. This seminar provides the resources necessary for technology developers, scientists, and policymakers to adopt and implement new inventions across the globe.

The seminar encompass various aspects of recent image processing and pattern analysis innovations including, but not limited to, mobile image tracking, motion picture analysis, pattern classification, multisensory data fusion, 3D imaging, supporting routing protocols, brain computer interfaces, image restoration, and medical imaging.

The many academic areas covered in this seminar include, but are not limited to:

- 3D Imaging
- Brain Computer Interface
- Image Restoration
- Medical Imaging
- Mobile Image Tracking
- Motion Picture Analysis
- Pattern Classification
- Wavelet Transform

A total 143 students got benefited through this Seminar. At the end of this course students learned on several conditions on Perspectives in Image Processing.

WORKSHOP ON REVIT ARCHITECTURE**

**DATE:11.02.2019**

**SUMMARY**

The department of Civil Engineering has organized a two days workshop on Revit Architecture, for all the Civil Engineering students from 08.02.2019 to 09.02.2019. The objective of Revit architecture is enable to create a full 3D architectural project model including walls, doors, windows, components, floors, ceilings, roofs and stairs using the basic tools that the majority of architectural users need. This includes how to navigate the user interface and use the basic drawing, editing and viewing tools. After the completion of this course, the students can operate basic revit commands and features to create parametric models and produce architectural drawings.

## **Seminar on Research Perspectives in IOT**

### **REPORT**

The Department of Information Technology, Christian College of Engineering and Technology has organized seminar titled “**Research Perspectives in IOT**” on 09.01.2019 between 10.00 AM to 11.30 AM at Seminar Hall and Mr. Kishore, Research Institute, Madurai, has delivered the seminar.

The Internet of Things (IoT) is an emerging paradigm that enables the communication between electronic devices and sensors through the internet in order to facilitate our lives. IoT use smart devices and internet to provide innovative solutions to various challenges and issues related to various business, governmental and public/private industries across the world. Through this programme, students have known the concepts behind IoT, its real time applications and its scope. Moreover, students could understand about how the IoT occupies the entire world today with recent inventions. The resource person has discussed the challenging factors while deploying IoT with low power devices and also discussed the solutions to rectify the challenges. This programme has been conducted with 20 active participants and has given confidence and interest to develop the IoT based projects by themselves.

## “Research Perspectives in Smart Grid”

Date: 18.09.2018

### REPORT OF THE EVENT

One day workshop was conducted by Department of Mechanical Engineering of CCET on **“Research Perspectives in Smart Grid”** on 18<sup>th</sup> September 2018

“Smart grid” generally refers to a class of technology used to bring utility electricity delivery systems into the 21st century, using computer-based remote control and automation. These systems are made possible by two-way communication technology and computer processing that has been used for decades in other industries. The rise of smart grid is a boon not only to society as a whole but to all who are involved in the electric power industry, its customers, and its many stakeholders. The STC is intended to educate the participants about the concept of Smart Grid, the rationale for smart grid technology and its characteristics.

The concept of smart grid is to add monitoring, analysis, control and communication capabilities to the national electrical delivery system to maximize the throughput of the system while reducing the energy consumption. The STC will enhance the knowledge of the participants as to how the smart grids builds on many technologies already used by electric utilities but adds communication and control capabilities that will optimize the operation of the entire electrical grid. Smart grid is also positioned to take advantage of new technologies, such as plug in hybrid electric vehicles, various forms of distributed generation, solar energy, smart metering, lighting management systems, distribution automation and many more.

The objective of the short term training program on smart grid technologies is to integrate and optimize distributed energy resources to achieve a more efficient and reliable grid, enable active participation of consumers with more environmental constraints. Integration of distributed energy resources and storage devices particularly Plug-in-hybrid electric vehicles with the utility grid poses significant challenges. Smart grid technologies provide the basis for standards development that will facilitate widespread deployment and integration of distributed energy resources. The aim of organizers is to bring up professional discussions on smart grid technologies and trends of power system operation and control to provide the educational platform and to assure dissemination of the knowledge to the participants.

---

The students were made aware of the rewards provided by the patent system, researchers and inventors would have better incentive to continue producing better and more efficient products for consumers. A total 73 students got benefited through this workshop.

A resource person Dr.M.Kanthababu was explaining about property rights on workshop on Intellectual Property Rights and Innovations at CCET seminar hall, administration block.
